P F K4 D5

kreussler TEXTILE CARE

PRENETT C

Prespotting agent for solvent-soluble stains in solvent cleaning. For perc, hydrocarbon, SYSTEMK4 and cyclosiloxane D5.

SOLVENTS P F K4 D5

STAIN GROUP	PH VALUE	CLEAN WITHIN	SHELF LIFE
Solvent-soluble	7.0	10–20 min	24 months

CHARACTERISTICS

- Removes solvent-soluble stains such as paint, varnish, cosmetics and adhesives.
- For solvent cleaning ONLY.
- Contains no halogenated hydrocarbons.
- Part of the Kreussler colour code: matches DEPRIT PROFESSIONAL for post-spotting.

TECHNICAL DATA

Stain group	Solvent-soluble stains
pH value	7.0
Solvents	Perc, hydrocarbon, SYSTEMK4, D5

PRESPOTTING

1. Identify the nature of the stain and moisten it sparingly with the matching undiluted PRENETT A, B or C.
2. Clean the article in the solvent process.
3. Articles treated with PRENETT A-B-C must be cleaned within 10–20 minutes of application.

ADVICE

Suitable for all fibres and dyes whose wet colourfastness meets normal textile-care standards. For direct dyes on cotton and silk, and whenever in doubt, test colourfastness first.

For stubborn oil, fat or varnish stains, also use DEPRIT PROFESSIONAL 4 (white). Blow off excess product with compressed air before cleaning.

On sensitive garments, flush out PRENETT A-B-C with compressed air immediately after treatment.

GENERAL NOTE

For prespotting in dry cleaning, PRENETT A, B and C can be used universally regardless of the solvent. For prespotting in wet cleaning, use DEPRIT PROFESSIONAL. For post-spotting, use only DEPRIT PROFESSIONAL: products 1, 2 and 3 successfully treat 80–90 % of all stains; for special demands, products 4, 5 and 6 are reliable problem solvers.

USE AND STORAGE

Minimum shelf life of 24 months in closed containers. Store cool and dry. Close tightly after dispensing.

Solvent key: P perchloroethylene · F hydrocarbon · W wet cleaning · K4 SYSTEMK4 · D5 cyclosiloxane D5
