INDUSTRIAL LAUNDRY · WASH-POWER BOOSTER

DERVAL

Protect

Wash-power booster for more efficient stain removal on synthetic and blended technical fabrics. Effective care at low alkalinity and 40–60 °C.

MAIN WASH	TEMPERATURE	PH VALUE	SHELF LIFE
3–5 ml/kg	40–60 °C	8.0 ± 0.2	24 months

CHARACTERISTICS

- Suitable for all cotton, synthetic and blended fabrics.
- Outstanding soil removal on polyester and polyester blends.
- Specific polymer additives give effective hydrophilicity on polyester.
- Lets sensitive technical textiles be washed so they keep their condition and continue to serve their purpose.
- Enables lower process temperatures and alkalinity, saving energy and resources.
- Reduces static charging of the fabric.
- Easy to dose: reduced viscosity and good miscibility with water.
- Not affected by water hardness.
- Can be used alongside all Kreussler general-purpose detergents.

TECHNICAL DATA

Form	Liquid
Colour	Colourless
Density	0.95 ± 0.05 g/ml
pH value	8.0 ± 0.2
Viscosity	70 ± 10 mPa·s (20 °C)

APPLICATION AND DOSAGE

FIELD OF APPLICATION	DOSAGE	TEMPERATURE
Pre-wash	**2–10 ml/kg**	30–50 °C
Main wash	**3–5 ml/kg**	40–60 °C
Neutral detergent	**3–7 ml/kg**	30–60 °C
Rapid wetting agent	**1 ml/kg**	30–60 °C

USE AND STORAGE

Minimum shelf life of 24 months in closed containers. Store out of reach of unauthorised persons, close properly after each use and use only from the original container. Store frost-free and warm to at least 15 °C before use; below 10 °C, correct function of dosing equipment cannot be guaranteed.
