LAUNDRY ANCILLARY · NEUTRALISER

OTTALIN

Citro

Neutralising agent for washer-extractors and tunnel washers.

DOSAGE	ADD TO	PH (10 G/L)	ACTIVE CONTENT
0.5–2.0 ml/kg	Last rinse	2.5	approx. 55 %

CHARACTERISTICS

- Suitable for all washing procedures and any water hardness.
- Guarantees reliable neutralisation under all conditions.
- Produces stable pH values in textiles, even after damp storage.
- Prevents later re-alkalising of the laundry and the yellow spots it causes.
- Stable, neutral pH in textiles improves passage through the ironer.
- Active ingredient content of approx. 55 %.
- Contains an antistatic component.
- Gives textiles a light, fresh scent.
- No unpleasant vapours; non-volatile and non-combustible.

TECHNICAL DATA

Form	Liquid
Colour	Colourless
Density	1.25 g/cm³
pH value (10 g/l)	2.5

DOSAGE

Reference value 0.5–2.0 ml per kg of textiles, added to the last rinsing bath. Dosage depends on the pH of the liquor.

Can be combined with fabric softener, starch and other finishing products.

USE AND STORAGE

Minimum shelf life of 24 months in closed containers. Store protected from unauthorised access and seal tightly after each use. Store above freezing point.
